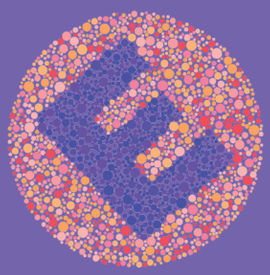
Jane Street



Come play Estimathon!

The Estimathon is a team-based contest that combines trivia, game theory, and mathematical thinking.

In teams, you'll attempt 13 problems in 30 minutes, challenging you to estimate numerical answers to math, science and general knowledge questions, such as:

- How many computers were connected to the Internet on January 1, 1989?
- What is the bandwidth under the Atlantic Ocean?
- How many YouTube videos have more than 1 billion views?

Wednesday 8th February, 18:00 –19:30 CET
Virtual via Zoom
