§8 Ongoing Courses

- C1:

Everything is going well with both programming and math.

- D1:

Nothing special of note.

- C2: Communication Systems, *EITA55*: During a lab session, almost all receivers had been overwritten by previous students. Even when the problem was already known on Monday, it had not been fixed on Tuesday. The solution to the problem can not be given directly to the students as it might reveal how the lab is solved.

- D2:

OMD, *EDAF60*: Annie has corresponded with Christian Söderberg via email regarding the sudden rescheduling mentioned last week. Later today, Annie will talk to Christian directly. If the problem is not resolved, it will be brought up to people higher up including Patrik Persson.

- C3:

Everything is going well

- D3:

Nothing special of note.

- VR/AR:

Nothing special of note. The first assignments have been handed in and some math exercises felt unnecessarily tedious.

- Other courses:

Compilers, *EDAN65*: The second lab is much heavier workload than the first lab. Luckily, it was communicated well beforehand.

Applied Mechatronics, *EIEN65*: A good course so far.

Computer Graphics, *EDAF80*: A good course. Ample support is given to the students which makes the labs very doable.

§9 Dismissal of
Volunteers
