§1	HDMO	Head of the Student Council Anahita Chavan declared the meeting opened at 12:21.
§2	Time and Place	Time and place was approved.
§3	Approval of Agenda	The meeting decided to approve the agenda
§4	Approval of Last Meeting Protocol	The meeting decided to to approve the protocol from 2025-10-08 .
§5	Information from external Representatives	The program board: Continuing on the discussion from last week: Moving HP points away from labs to only the examination would affect among others PFK, EDAA01. Annie asked the council meeting for their opinion regarding the matter. AI assisted hand-ins remain a problem, which is why the change was proposed. Patrick and Hampus discussed the matter and understood that it was mostly a change to promote learning. Especially for other programs where the course lacks the same relevance. The meeting did not have strong feelings about the change. A lack of motivation and encouragement to do the labs on time was

brought up. PFK should not be changed for now is the opinion shared.

§6 Finished Courses

CEQ Cognition, *EXTA65*: Few responses were given in the CEQ, the course working well enough could be the cause to why. Perhaps AI could be integrated in the course more.

CEQ Signal Processing in Multimedia, *EITAA50*: The role of the Course in the D program was discussed as the content overlaps with automatic control. The lack of focus into the multi media part was noted. While the course administrator wants to rework the course, the program board plans for it to change much later. Where the discussion landed is unsure, but clearly they were receptive to feedback and open to making changes.

§7 Ongoing Courses

- C1:

Nothing special of note, everything is going well.

- D1:

One Dimensional Analysis, B1, *FMAB65*: The course administrator was not aware of the role of course representative. Due to the size of the course, it is not guaranteed that the D program would be called to the CEQ meeting. It should be possible however to do so for our math courses.

- C2:

Communications systems, *ETSF15*: A mandatory whole day presentation is scheduled during Monday, during the exam study week. Too much work for the presentation given that the content is not necessarily relevant. The extra scheduled timeslots are put during other obligatory or important events. In summary, the course has had more difficulties than last year, which will be reflected in the CEQs.

- D2:

OMD, *EDAF60* - Same as previous week. The feedback for the Excel project could have signaled as returned more clearly.

A TA for an EIT course has been reported for discriminatory behavior, the matter has been notified to the Union.

- C3:

No one present. Nothing special of note.

- D3:

Nothing special of note. Everything is going well.

- VR/AR:

VRAR1: Currently struggling with the assignments. Quite a few complaints were brought up regarding the format of the lecture for image analysis, *FMAN20*. Descriptions shown are very surface level without making the students understand the content.

Computer Graphics, *EDAF80*: Extra lab sessions are added for students to have enough time to complete the labs.

- Other courses: Säkra system - No new criticism regarding the course has been brought up.

Language Technology, *EDAN20*: While the content of the labs are good, some of the later labs take a long time to run depending on hardware and settings used.

§8	Dismissal of Volunteers	No one to dismiss.
§9	Nominations and other Electoral matters	The meeting decided to elect Hampus Edén as Volunteer within the Student Council, mandate 2025-07-01 til 2026-06-30.
§10	Other Matters	Not enough time was left for Other Matters. Send urgent complaints to https://www.tlth.se/klaga as this was the last meeting for lp1.
§11	Visit from the Program Board	
§11	HDMC	Head of the Student Council Anahita Chavan declared the meeting closed at 13:02.
